LIST OF CONTENTS FOR VOLUME 21, 1994

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1994 Volume 21, Number 1 January-February

Contents

W.M. Worek and W. Lu	1	Measurement errors associated with two-wavelength interferometric techniques in salt water solutions
A. Hajji	9	Analysis of entropy production in a heat regenerator
A.J. Fowler and A. Bejan	17	Correlation of optimal sizes of bodies with external forced convection heat transfer
J.A. Manrique and J.M. Villaseñor	29	Air pollution dispersion by using solar energy
S. Yapici, M.A. Patrick and A.A. Wragg	41	Hydrodynamics and mass transfer in decaying annular swirl flow
C.-H. Cheng and C.-S. Huang	53	Extended model for single-blow transient testing method in evaluating thermal performance of heat transfer surfaces
N. Brauner and D.M. Maron	65	Stability of two-phase stratified flow as controlled by laminar/turbulent transition
N. Patel and D.B. Ingham	75	Analytic solutions for the mixed convection flow of non-Newtonian fluids in parallel plate ducts
J. Mao and S. Rooke	85	Transient analysis of extended surfaces with convective tip
T. Elperin and G. Rudin	95	Analytical solution of heat conduction problem for a multilayer assembly arising in photothermal reliability testing
J.F. Nastaj	105	Vacuum conductive-radiative drying as a two-region moving boundary problem
C.-X. Lin, S.-Y. Ko and M.-D. Xin	117	Effects of surface radiation on turbulent free convection in an open-ended cavity
N.C. Sacheti, P. Chandran and A.K. Singh	131	An exact solution for unsteady magnetohydrodynamic free convection flow with constant heat flux
D.A.S. Rees and A.P. Bassom	143	The linear wave instability of boundary layer flow induced by a horizontal heated surface in porous media
Announcement	151	7th International Symposium on Transport Phenomena in Manufactoring Processes

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1994 Volume 21, Number 2 March-April

Contents

I. Arshavski, Y. Nekhamkin, S. Olek and E. Elias	153	Conjugate heat transfer in an open loop thermosyphon
C. Unal and K.O. Pasamehmetoglu	167	A numerical investigation of the effect of heating methods on saturated nucleate pool boiling
Y.-M. Teng and J.E. Akin	179	An effective capacity approach to Stefan problems using simple isoparametric elements
S. Sundarraj and V.R. Voller	189	Effect of macro scale phenomena on microsegregation
A.Z. Sahin, B.S. Yilbas and A.Z. Al-Garni	199	Transient heat conduction in a slab during direct resistance and induction heating
S.M. Zubair and M.A. Chaudhry	207	Temperature solutions due to steady, periodic-type, moving-point-heat sources in an infinite medium
A.M. Hussein	217	An iterative linearization of the non-linear inverse axial dispersion model
T. Elperin and A. Fominykh	227	Exact analytical solution of a convective diffusion from a wedge to a flow with a first order chemical reaction at the surface
J.R. Leith and J.G. Maveety	237	Wavenumber evolution in Rayleigh-Bénard convection with air in moderate size containers
T.H. Hwang	249	Mixed convection heat transfer to liquid metals in a rotating crucible
V.D. Murty, C.L. Clay, M.P. Camden and E.R. Anselmo	261	A numerical study of the stability of thermohaline convection in a rectangular box containing a porous medium
D.G. Van Dyne and W.E. Stewart, Jr.	271	Natural convection heat and mass transfer in a semi-cylindrical enclosure filled with a heat generating porous media
S.Gh. Etemad and A.S. Mujumdar	283	The effect of aspect ratio and rounded corners on the laminar forced convection heat transfer of a non-Newtonian fluid in the entrance region of a rectangular duct
I. Pop and A. Nakayama	297	Conjugate free convection from long vertical plate fins in a non-Newtonian fluid-saturated porous medium
I. Dincer	307	Heat transfer coefficients for slab shaped products subjected to heating
M. Abu-Zaid	315	An experimental study of the evaporation of gasoline and diesel droplets on hot surfaces

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1994 Volume 21, Number 3 May-June

Contents

S.C. Chen and Y.C. Chung	323	Numerical simulations of the cyclics transient mold heat transfer in injection mold cooling process
S. Olek	333	Quenching of a composite slab
K.-H. Fuh, W.-C. Chen and P.-W. Liang	345	Temperature rise in twist drills with a finite element approach
H.-S. Kou and C.L. Lee	359	Implementation of generalized finite difference formulas and truncation errors for each derivative
H.S. Takhar and P.C. Ram	371	Magnetohydrodynamic free convection flow of water at 4°C through a porous medium
A. Hadim and G. Chen	377	Non-Darcy mixed convection in a vertical porous channel with discrete heat sources at the walls
A. Aziz	389	Optimum design of a rectangular fin with a step change in cross-sectional area
J.A. Kolodziej and Z. Kończak	403	Determination of effective thermal conductivity for a laminated composite slab in non-linear case
Z. Zapalowicz	411	Influence of air velocity on droplet's wetting and evaporation conditions on a flat surface
C.C. Lakshmanan and O.E. Potter	421	Dynamic simulation of a countercurrent heat exchanger modelling-start-up and frequency response
P. Arce and I.M.B. Trigatti	435	Convective-diffusive heat transfer in a packed-bed with constant heat flux at the wall: an asymptotic solution for $\xi \rightarrow$ large
R.L. Frederick and F. Comunian	447	Air-cooling characteristics of simulated grape packages
	459	Errata

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1994 Volume 21, Number 4 July-August

Contents

L. Galbiati and P. Andreini	461	Flow pattern transition for horizontal air-water flow in capillary tubes. A microgravity "equivalent system" simulation
M. Spiga and G.L. Morini	469	A symmetric solution for velocity profile in laminar flow through rectangular ducts
O.O. Onyejekwe	477	Heat transfer characteristics of a partially insulated tube with an impulsive temperature rise
S.M. Sami, P.J. Tulej and B. Song	489	Heat transfer characteristics of ternary blends inside enhanced surface tubing
S.C. Chen, K.F. Hsu and J.S. Huang	499	Observation of the polymer melt flow in injection molding process using co-injection molding technique
B.S. Yilbaş and A.Z. Şahin	509	Laser heating mechanism including evaporation process
C.-H. Cheng, W.-P. Ma and W.-H. Huang	519	Numerical predictions of entropy generation for mixed convective flows in a vertical channel with transverse fin array
A. Campo and L. Harrison	531	Prediction of safe tip temperatures in uniform annular fins for the design of thermal exchange equipment via symbolic mathematics
H.K. Varma, R.K. Mehrotra, K.N. Agrawal and S. Singh	539	Heat transfer during pool boiling of LiBr-water solutions at subatmospheric pressures
O.O. Onyejekwe	549	Finite analytic numerical solution of buoyancy induced flow in a rectangular cavity
S.A. Theerthan and J.H. Arakeri	561	Planform structure of turbulent Rayleigh-Bénard convection
K.N. Rao and I. Pop	573	Transient free convection in a fluid saturated porous media with temperature dependent viscosity
T.-Y. Wang	583	Conjugate mixed convection-conduction heat transfer along a vertical cylindrical fin in non-Newtonian fluids
C.S. Yueh, C.I. Weng and C.C. Hwang	597	A study of parallel-loop thermosyphon containing cold water
R. Černy, F. Vodák and P. Přikryl	605	Effect of density change on the stability of a planar phase interface
Announcement	615	Organizational Changes — International Centre for Heat and Mass Transfer
Announcement	616	9th International Conference on Numerical Methods in Laminar and Turbulent Flow
Announcement	617	9th International Conference on Numerical Methods for Thermal Problems
Announcement	618	Tenth Symposium on Turbulent Shear Flows

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1994 Volume 21, Number 5 September-October

Contents

A. Taniguchi and Y.H. Mori	619	Effectiveness of composite copper/graphite fluoride platings for promoting dropwise condensation of steam: a preliminary study
L.P. Chua and E.Y. Goh	629	Design and eliminating the buoyancy effect of a heated circular jet
F.L. Tan and K.C. Leong	641	Effect of wall temperature and aspect ratio on the solid-liquid interface during freezing inside a rectangular enclosure
T. Elperin and A. Fominykh	651	Mass transfer during gas absorption from a linear cluster of slugs in the presence of inert gases
I. Turner and K. Bremhorst	661	An investigation on the effect of neglecting compressible work terms in the energy equation when simulating high temperature and pressure drying processes
M.A. Chaudhry and S.M. Zubair	673	On a pair of functions useful in heat conduction problems
M.-H. Su and W.H. Sutton	683	Transient heat transfer in a silica window with phase change
H. Ammari	695	Heat transfer measurement techniques of film cooling in gas turbine blades
H. Ammari	707	Mass transfer measurement techniques of film cooling in gas turbine blades
S.C.M. Yu and O. Kitoh	719	A general formulation for the decay of swirling motion along a straight pipe
J.N.N. Quaresma and R.M. Cotta	729	Exact solutions for thermally developing tube flow with variable wall heat flux
M.A. Al-Nimr, M. Al-Jarrah and A.S. Al-Shyyab	743	Trial solution methods to solve unsteady PDE
T.H. Mai, N. El Wakil and J. Padet	755	Transient mixed convection in an upward vertical pipe flow: temporal evolution following an inlet temperature step

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1994 Volume 21, Number 6 November-December

Contents

V. Velidandla, S. Putta and R.P. Roy	765	LDV measurement of turbulent liquid velocity field in channels with curved wall
J.Y Tu and C.A.J. Fletcher	775	An improved model for particulate turbulence modulation in confined two-phase flows
M.K. Telikicherla, M.C. Altan and F.C. Lai	785	Autoclave curing of thermosetting composites: process modeling for the cure assembly
O. Manca and V. Naso	799	Solution to steady-state three-dimensional conduction for a rectangular surface heat source on a semi-infinite body
C. Shu, B.C. Khoo, K.S. Yeo and Y.T. Chew	809	Application of GDQ scheme to simulate natural convection in a square cavity
W.-S. Fu, C.-C. Tseng and Y.-C. Chen	819	Natural convection in an enclosure with non-uniform wall temperature
C.Y. Liu, B.C. Gooi, Y.W. Wong and J.H. Yeo	829	The effect of inlet velocity distribution on the temperature field of a rotating circular pipe
K.J. Kim and V.P. Janule	839	Dynamic surface tension of aqueous lithium bromide with 2-ethyl-1-hexanol
S.C.M. Yu	849	Some aspects of the flows behind lobed forced mixers
I. Dincer	859	Comparison of experimental data and analytical solution for cooling of cylindrical produces
I. Dincer and S. Dost	871	A technique for determining surface temperatures of geometrical objects using center temperature values during cooling
P. Vadasz	881	Stability of free convection in a narrow porous layer subject to rotation
I. Pop and T.-Y. Na	891	Natural convection of a Darcian fluid about a wavy cone
